

TRANSVISION 2002

FLOOR SHOWCASES

Four exhibit floor showcases will display technology applications in safety and security, mobility and accessibility, economic growth and trade, and human and natural environment. Conference attendees can see how the technologies work in the Showcase and how they are implemented in the APTA Expo.

- See operational examples of transit technology
- Learn first-hand the challenges encountered and the solutions achieved

SESSIONS

In addition to the Showcases, a series of sessions will involve transit industry discussions of crosscutting issues:

- Systems development
- Standards
- Procurement
- Funding
- Implementation
- Operations and Maintenance

DISTANCE LEARNING

Technology Summit materials and displays will be accessible to the public through an interactive website.

A UNIQUE OPPORTUNITY

This technology summit offers the unusual opportunity to gather first-hand experience from those designing and implementing technology projects.

- Learn about new technology from transit agency officials and their private partners
- Discover how that technology is implemented at the APTA Expo
- Benefit from lessons learned at the Sessions

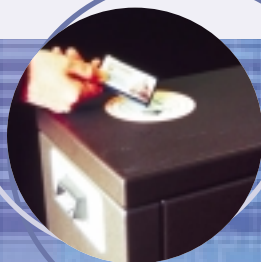

Don't miss it!

Environment

Economic Growth

TRANSVISION 2002 is sponsored by the U.S. Department of Transportation, Federal Transit Administration.

TRANSVISION 2002 will:

- Showcase selected and innovative federal investments in productive urban mass transportation technology and explore lessons learned from these deployments.
- Offer significant opportunities for technology sharing. It will challenge industry leaders, strategic planners, developers and implementors of new technology, and operating personnel.
- Broaden the view of all urban mass transportation stakeholders towards making investments in highly effective and efficient transit technology.
